

## Group Aim, Content, and Participants

**Executive Functioning Group Therapy** is aimed at helping adolescents in Grades 6 to 8 to become more independent in completing tasks. Specifically, this group will address the following skills, but not limited to:

- staying on task
- planning
- following-through
- remaining organized
- adapting to unexpected situations
- managing time
- self-monitoring

Sessions will include role-playing, development of functional strategies for school and home, and activities to enhance cognitive rehabilitation. The first and last group sessions will take place with a caregiver present to assist participants in applying the content learned in the group to real-world settings beyond the clinic.

This group is facilitated by a Registered Occupational Therapist and will take place in-person at the clinic.

A complimentary pre-group screening is offered to determine group appropriateness.
